# RFC Editor Model

Why are we here

- RFC Editor is an IAB oversight responsibility
- We started a reorganization of the RFC Editor organizational structure over 2 years ago
    - Resulted in publication of RFC5620
    - 4 components that make up the 'RFC Editor'
    - Leading component: RFC Series Editor

Implementing RFC5620 (end 2009)

- Production Center and Publisher hired
- Timely hiring of an RFC Series Editor failed
- IAB decided to hire a 'Transitional Series Editor'
  - Get Running Code
  - Provide Recommendations about the model and the job description
  - Clarify relations, authority and responsibilities, and hiring process
Process

TODAY

- Glenn will provide his recommendations
  - These recommendations and reflect draft-kowack-rfc-editor-model-version2-00

Next Weeks

- Glenn will collect input and feedback and will facilitate work towards a consensus

December 8

- IAB will determine whether a consensus is emerging
  - If not we will work on alternative timelines

- Glenn will present and provide motivations for his recommendations
- Open Microphone
  - Q and A, and Discussion
    - moderated by Olaf
    - Glenn's role is to explain his recommendations and to record your suggestions and reasons for change and improvement
